STATEMENT OF POSSIBLE TAX BENEFITS AVAILABLE TO THE DEBENTURE HOLDER(S)

The note is based on the provisions of the IT Act, as on date, taking into account the amendments made by the Finance Act, 2019 (FA 2019).

This note intends to provide general information on the applicable Indian tax provisions. However, in view of the nature of the implications, the investors are best advised to consult their respective tax advisors/consultants for appropriate counsel with respect to the specific tax and other implications arising out of their participation in the Portfolio as indicated herein.

Taxability under the IT Act

1. Taxability under various heads of Income

The returns received by the investors from NCD in the form of interest and the gains on the sale/ transfer of the NCD, may be characterized under the following broad heads of income for the purposes of taxation under the IT Act:

- Profits and gains from business;
- Income from capital gains; and
- Income from other sources.

The returns from the investment in the form of interest would generally be subject to tax under the head “income from other sources”. Under certain circumstances depending upon the facts and circumstances of the taxpayer, the interest income may be subject to tax under the head “Profits and gains from business”.

The gains from the sale of the instrument or security may be characterised either as “Profits and gains from business” or as “Capital Gains”. This is discussed in the following paragraph.

a. “Profit and gains from business” versus “Capital gain”

Gains from the transfer of securities/instruments of the investee companies may be characterised as “Capital Gains” or as “Profits and gains from business” in the hands of an investor, depending upon whether the investments in NCD are held as ‘investments’ or as ‘stock in trade’. This can vary based on the facts of each investor’s case (taking into account factors such as the magnitude of purchases and sales, ratio between purchases and sales, the period of holding, whether the intention to earn a profit from sale or to earn interest etc.)

The investors may obtain specific advice from their tax advisors regarding the tax treatment of their investments.

2. Taxation of interest, profits from business and capital gains

Taxation of Interest

Income by way of interest received on debentures, bonds, and other debt instruments held as investments will be charged to tax as under the head “Income from Other Sources”. Such interest, taxed under the head “Income from other sources”, would therefore be taxed at the rates applicable to the investor after deduction of expenses, if any, allowable under section 57 of the IT Act. These are essentially, expenses (not being in the nature of capital expenditure) laid out or expended wholly and exclusively for the purpose of earning the interest income.

In case of debentures, bonds or other debt instruments held as stock in trade and sold before their maturity, the interest accrued thereon till the date of sale and included in the sale price, may also be

charged to tax as “business income” (treatment separately discussed below).

Further, in case of certain specific fixed income securities and certain debt instruments, purchased and held as investments and transferred prior to maturity, the gain from the transfer may also possibly be characterised as “capital gains” (treatment separately discussed below).

The investors may obtain specific advice from their tax advisors regarding the tax treatment of their investments.

Taxation of Profits and gains from business

As discussed above, depending on the particular facts of each case, the investments may, in certain cases, be regarded to be in the nature of stock in trade and, hence, the gains from the transfer/ sale of such investments would be considered to be in the nature of “Profits and gains from business”.

In such a scenario, the gains from the business of investing in the NCD chargeable to tax on a ‘net’ basis (that is, net of allowable deductions for expenses/allowances under Chapter IV-D of the IT Act).

The “Profits and gains from business” so computed, as reduced on account of set-off of losses and unabsorbed allowances, if any, would go to form part of the gross total income of the investor.

The gross total income would be reduced by deductions if any available under Chapter VI-A of the IT Act and the resultant total income would be subject to tax at the tax rates as applicable to the investor (refer Note 1).

Investors should obtain specific advice from their tax advisors regarding the manner of computing business income, the deductions available therefrom and the tax to be paid thereon.

Taxation of Capital Gains

As discussed above, based on the particular facts of each case, the investments may, in certain cases, be regarded to be in the nature of capital assets and hence the gains from the transfer/ sale of such investments would be considered to be in the nature of “capital gains”.

As per section 2(14) of the Act, the term ‘capital asset’ had been defined to inter alia mean any securities held by a foreign institutional investor which has invested in such securities in accordance with the regulations made under Securities and Exchange Board of India Act, 1992.

• *Period of holding – long-term & short-term capital assets*

A security (other than a unit) listed on a recognised stock exchange in India or zero coupon bonds (as defined) held for a period of more than 12 months are considered long-term capital assets.

Any assets (other than as described above, the shares of unlisted companies and immovable property) are considered long-term capital assets where they are held for a period of more than 36 months.

The above assets, where held for a period of not more than 12 months or 36 months, as the case may be will be treated as short-term capital assets.

The gains arising from the transfer of long-term capital assets are termed as long-term capital gains.

The gains arising from the transfer of short-term capital assets are termed as short-term capital gains.

• *Computation of capital gains*

Capital gains are computed after reducing from the consideration received from the transfer of the capital asset, the cost of acquisition of such asset and the expenses incurred wholly and exclusively in connection with the transfer.

• *Nature of transactions and resultant capital gain treatment*

The capital gains tax treatment of transactions is given in Note 4.

The following transactions would attract the “regular” capital gains tax provisions:

- ✓ Transactions of sale of debentures, bonds, listed or otherwise; and
- ✓ Transactions in structured debentures.

- ***Set off of capital losses***

Long-term capital loss of a year cannot be set off against short-term capital gains arising in that year. On the other hand, short-term capital loss in a year can be set off against both short-term and long-term capital gains of the same year.

Unabsorbed short-term and long-term capital loss of prior years can be separately carried forward for not more than eight assessment years immediately succeeding the assessment year for which the first loss was computed. Unabsorbed short-term capital loss shall be eligible for set off against short-term capital gains as well as long-term capital gains. However, unabsorbed long-term capital loss shall be eligible to be set off only against long-term capital gains.

- ***Certain deductions available under Chapter VI-A of the IT Act***

Individuals and Hindu Undivided Families would be allowed a deduction in computing total income, inter alia, under section 80C of the IT Act for an amount not exceeding INR 150,000 with respect to sums paid or deposited in the previous year in certain specified schemes.

- ***Alternate Minimum Tax (“AMT”)***

The Finance Act 2012 has provided the levy of AMT to tax investors (other than companies) to pay AMT at the rate of 18.5 percent on the adjusted total income. In a situation where the income-tax computed as per the normal provisions of the IT Act is less than the AMT on “adjusted total income”, the investor shall be liable to pay tax as per AMT. “Adjusted total income” for this purpose is the total income before giving effect to the deductions claimed under section C of chapter VI-A (other than section 80P) and deduction claimed, if any, under section 10AA and deduction claimed, if any, under section 35AD as reduced by the amount of depreciation allowable in accordance with the provisions of section 32 as if no deduction under section 35AD was allowed in respect of the assets on which the deduction under that section is claimed. AMT will not apply to an Individual, HUF, AOP, BOI or an Artificial Juridical Person if the adjusted total income of such person does not exceed INR 20 lakhs. Further, the credit of AMT can be further carried forward to fifteen subsequent years and set off in the years(s) where regular income tax exceeds the AMT.

The provisions of AMT also provides that the Foreign Tax Credit (FTC) claimed against AMT liability which exceeds the FTC that would have been allowable while computing income under normal provisions, would be ignored while computing tax credit under AMT.

- ***Minimum Alternative Tax (MAT)***

Section 115JB of the IT Act, provides that where the tax liability of a company (under the regular provisions of the IT Act) is less than 18.5 percent of its 'book profit', then the book profit is deemed to be its total income and tax at the rate of 18.5 percent (plus applicable surcharge and an health and education cess) is the minimum alternate tax (MAT) payable by the company.

Tax credit is allowed to be carried forward for fifteen years immediately succeeding the assessment year in which tax credit becomes allowable. The tax credit can be set-off in a year when the tax becomes payable on the total income is in accordance with the regular provisions of the IT Act and not under MAT.

As per the provisions of section 115JB of the IT Act, the amount of income accruing or arising to a foreign company from capital gains arising on transactions in securities or interest, royalty, or fees for technical services chargeable to tax at the rates specified in Chapter XII of the IT Act, shall be excluded from the purview of MAT, if such income is credited to the Profit and Loss Account and the tax payable on such income under the normal provisions is less than the MAT rate of 18.5%. Consequently, corresponding expenses shall also be excluded while computing MAT.

Further, Explanation 4 to section 115JB of the IT Act clarifies that provisions of MAT will not apply to a foreign company if:

- a) It is a resident of a country with which India has a DTAA and the company does not have a permanent establishment in India in accordance with the provisions of such DTAA; or
- b) it is a resident of a country with which India does not have a DTAA and the foreign company is not required to register under any law applicable to companies.

The above Explanation is inserted and shall be deemed to be effective from AY 2001-02.

Further, it is provided that the FTC claimed against MAT liability which exceeds the FTC that would have been allowable while computing income under normal provisions, would be ignored while computing tax credit under MAT.

- ***Taxability of non-resident investors under the tax treaty***

In case of non-resident investor who is a resident of a country with which India has signed a Double Taxation Avoidance Agreement (“DTAA” or “tax treaty”) (which is in force) income tax is payable at the rates provided in the IT Act, as discussed above, or the rates provided in such tax treaty, if any, whichever is more beneficial to such non-resident investor.

For non-residents claiming such tax treaty benefits, the IT Act mandates the obtaining from the home country tax authority of a Tax Residency Certificate (‘TRC’).

Section 90(5) of the IT Act (introduced by the Finance Act, 2013) provides that an assessee to whom a DTAA applies shall provide such other documents and information, as may be prescribed. Further, a notification substituting Rule 21AB of the Income-tax Rules, 1962 (Rules) has been issued prescribing the format of information to be provided under section 90(5) of the IT Act, i.e. in Form No 10F. Where the required information is not explicitly mentioned in the TRC, the assessee shall be required to furnish a self-declaration in Form No 10F and keep and maintain such documents as are necessary to substantiate the information mentioned in Form 10F.

- ***General Anti Avoidance Rules (GAAR)***

The General Anti Avoidance Rule (GAAR) was introduced in the Income-tax Act by the FA, 2012 and was proposed to be made effective 1 April 2013. The FA 2015 makes the provisions of GAAR applicable prospectively from 1 April 2017. Further, investments made up to 31 March 2017 would be protected from the applicability of GAAR.

- ***Widening of taxability of Capital Gains***

In the context of taxation of capital gains, the definitions of “capital asset” and “transfer” are widened with retro-effect from 1 April 1961 specifically with a view to tax, in the hands of non-residents, gains from direct or indirect transfer of assets in India.

- ***Withholding provisions***

Detailed Rationale & Key Rating Drivers

The rating of ECL Finance derives strength from ECL Finance being part of Edelweiss Group which has a diversified business profile (consolidated basis), experienced management team, adequate capitalization, good asset quality and comfortable liquidity profile. The ratings are, however, constrained by dependence on revenue from the capital market related activities which has inherent volatility and is declining due to diversification of revenue streams, client concentration risk in its wholesale credit book, and risk associated with relatively new businesses. The performance of the group's new businesses, asset quality, profitability and gearing levels are the key rating sensitivities

Outlook: Positive

The outlook has been revised from 'Stable' to 'Positive' on expectation of continued improvement in granularity of the credit book while maintaining profitability and asset quality. The outlook may be revised to 'Stable' if the credit book granularity does not improve as anticipated or there is significant moderation in profitability and asset quality. CARE will take a review of the outlook based on detailed review of FY19 results.

Detailed description of the key rating drivers

Key Rating Strengths

Diversified business profile of the group

Edelweiss Financial Services Ltd (EFSL) on a consolidated basis, is a diversified financial services company with presence in various business segments related to credit in retail credit including mortgage finance (housing loans, loans against property) and SME credit, corporate credit and distressed assets credit including asset reconstruction. Its Franchise & Advisory businesses include wealth management, asset management, and capital market businesses which include equity and commodities broking (both institutional and retail) and investment banking. Its insurance business includes both life and general insurance businesses. The share of the group's credit business in total income has increased over the past few years from 41% in FY15 to 45% in FY18. Investment banking / advisory, broking and trading accounted for 20%, 4%, and 7% respectively in FY18. The share of retail book has been steadily increasing from 28% as on March 2015 to 39% as on March 2018. The share of retail book is expected to further increase given the group's objective of diversifying the credit book.

Experienced management team

EFSL has a strong management team with a rich experience in the financial sector. The senior management team of Edelweiss has been quite stable over the last few years and most of the senior management has been with Edelweiss for a long period.

Adequate capitalization levels

In FY18, EFSL raised Rs. 1,528 crore via Qualified Institutional Placement (QIP). As a result, the consolidated tangible net-worth including minority interest of the group increased to Rs. 7,409 crore (Rs.6,320 crore- excluding minority interest) as on March 31, 2018 as compared to Rs. 4,960 crore (Rs.4,002 crore- excluding minority interest) as on March 31, 2017. However, gearing levels remain relatively high. The groups' debt levels have increased significantly from Rs.13,017 crore as on March 31, 2014 to Rs.47,323 crore as on March 31, 2018 on account of significant growth in its credit book. As a result, gearing levels (total borrowings / tangible net-worth including minority interest) rose from 4.11 times as on March 31, 2014 to 6.39 times as on March 31, 2018. As per EFSL's management, gearing (excluding liquid balance sheet management unit assets) was 4.94 times as on March 31, 2018 (3.06 times as on March 31, 2014). The gearing level (total borrowings/tangible net-worth) stood at 6.68 times as on December 31, 2018.

¹ Complete definitions of the ratings assigned are available at www.careratings.com and in other CARE publications.

On a standalone basis, as on March 31, 2018, ECL Finance reported CAR of 17.09% (16.14% as on March 31, 2017) and Tier 1 CAR of 11.82% (11.35% as on March 31, 2017). The overall gearing was 7.80 times as on March 31, 2018 (7.87 times as on March 31, 2017).

Good asset quality

EFSL's asset quality remains comfortable. As on March 31, 2018, Gross NPA ratio was 1.75% (on 90+DPD) as compared to 1.59% as on March 31, 2017 (on 120+DPD). Net NPA ratio was 0.70% as on March 31, 2018 (FY17: 0.60%) while Net NPA to Net-worth ratio was 3.94% (FY17:3.43%). On a consolidated basis, the group had written off Rs.427 crore of loans in FY18 (Rs.245 crore in FY17). As on December 31 2018, the Gross NPA ratio was 1.84% and Net NPA ratio was 0.78%. ECL Finance reported Gross NPA of 1.82% (on 90+DPD) as on March 31, 2018 as compared to 1.85% (on 120+dpd) as on March 31, 2017. As on March 31, 2018, the Company reported Net NPA of 0.75 % (0.64% as on March 31, 2017). The Net NPA to Net worth ratio was 5.77% as on March 31, 2018.

Comfortable liquidity profile

EFSL maintains investments in government securities to provide overnight liquidity cushion. As on March 31, 2018, 5% of EFSL's total assets were in government securities (Balance sheet Management Unit [BMU] related assets) which ensures a matched ALM profile.

As on December 31, 2018, liquidity position of EFSL was comfortable with positive cumulative mismatches in all the time brackets .EFSL had a liquidity cushion of Rs.7100 crore consisting of mutual funds of Rs.4800 crore, FD & Bank balance of Rs.700 crore, and undrawn bank lines of Rs.1600 crore. It also had other liquid assets of Rs.6900 crore which consists of LAS book and liquid assets which can be converted to cash within 30-45 days. As on March 15, 2019, EFSL had a liquidity cushion of Rs.5300 crore.

Key Rating Weakness

Substantial proportion of revenue from the capital markets related activities

A significant proportion of EFSL's revenue is related to the capital markets led activities, which include equity broking, investment banking, capital market related loan portfolio, asset management. However with increase in size of the credit business, dependency on capital markets has been declining over past few years.

Client concentration risk in its wholesale credit book

Wholesale credit book (real estate lending and structured credit) comprised of 47% of total credit book as on March 31, 2018. The wholesale credit book is characterized by concentration risk given the high ticket size of loans. As on March 31, 2018, top 10 exposures accounted for 53% (77% as on March 31, 2017) of Tangible Net-worth. In FY18, top ten exposures account for 17% of wholesale credit book. The client concentration is expected to moderate with the group planning to lend more to real estate developers through its asset management fund. As per EFSL's management, loans in the wholesale credit book have an asset cover of over 2 times.

Risk associated with relatively new businesses

The Edelweiss group has recently forayed into new businesses, including expanding insurance (both life and general), distress assets. The insurance business is characterized by high competition and the group's ability to successfully establish a position in these segments is yet to be seen. Furthermore, the group has acquired a large portfolio of distressed assets in the past few years and the resolution in such cases needs to be seen. The introduction of Insolvency and Bankruptcy Code (IBC) is expected to expedite the resolution of distress assets in the economy. However, the group has demonstrated a track record of setting up other new businesses since 2010, such as retail finance, retail broking, mutual fund and agri services & credit etc. and scaling up them in due course.

Liquidity Profile: As on December 31, 2018, liquidity position of EFSL was comfortable with positive cumulative mismatches in all the time brackets .EFSL had a liquidity cushion of Rs.7100 crore consisting of mutual funds of Rs.4800 crore, FD & Bank balance of Rs.700 crore, and undrawn bank lines of Rs.1600 crore. It also had other liquid assets of Rs.6900 crore which consists of LAS book and liquid assets which can be converted to cash within 30-45 days. As on March 15, 2019, EFSL had a liquidity cushion of Rs.5300 crore

Detailed Rationale

CRISIL has assigned its 'CRISIL AA/Stable' rating to Rs 2,000 crore retail bond of ECL Finance Ltd (ECLF; part of the Edelweiss group), while reaffirming the outstanding ratings at 'CRISIL AA/CRISIL PP-MLD AA/Stable/CRISIL PP-MLD A1+r/CRISIL A1+'. CRISIL has withdrawn its rating on Non-Convertible Debentures of Rs 150 crore and Long-Term Principal-Protected Market-Linked Debentures of Rs 29.35 crore (see Annexure 'Details of Rating Withdrawn' for details) in line with its withdrawal policy. CRISIL has received independent confirmation that these instruments have been fully redeemed.

The ratings continue to reflect the group's diversified business and earnings profile with presence across credit, capital market, and insurance segments, and its demonstrated ability to build significant presence in multiple lines of business. The ratings also factor in an established market position in capital market-related segments resulting in a regular stream of fee-based income.

These rating strengths are partially offset by vulnerability of asset quality to concentration in the wholesale lending segment, particularly in the current challenging environment, for some business lines like the real estate developer segment. Furthermore, the gearing and profitability ratios are weaker than those of its peers.

Analytical Approach

For arriving at the ratings, CRISIL has combined the business and financial risk profiles of all entities in the Edelweiss group, including ECLF. This is because they have significant operational, financial and managerial integration and also operate under the common Edelweiss brand.

Please refer Annexure - List of Entities Consolidated, which captures the list of entities considered and their analytical treatment of consolidation.

Key Rating Drivers & Detailed Description

Strengths

* **Diversified business profile:** The group has been diversifying within each of its key businesses, as well as entering new

businesses, over the past few years. It now has a presence in retail and wholesale lending, securities broking, wealth management, asset management, insurance, stressed-asset management, and alternate assets. Many of these have now attained sizeable scale and are expected to lend greater stability to earnings. Within capital markets, retail broking volumes now constitute around half of the overall broking volumes. In terms of new business lines, the life insurance business has grown significantly and is expected to break even over the next 2-3 years. In the lending business (book size of Rs 35,555 crore as on December 31, 2018, excluding the capital deployed in distressed assets credit), the group will continue to focus on increasing the granularity of the loan book. As a part of this strategy, it will focus on growing the retail book (comprising of mortgage, small and medium enterprise [SME], and retail loans against shares [LAS]) from ~50% as on December 31, 2018 (45% as on March 31, 2018) to 60% by March 2020. Even within wholesale lending, the focus will be on a new segment of mid-market corporate lending with lower ticket size of Rs 50-100 crore as against large ticket size in the existing structured collateralised credit. However, given the current evolving liquidity situation since September 2018 for non-banks and the slowdown seen in the sector, the group has reduced its disbursements in the wholesale segment. The group had also adopted a cautious approach for the retail segment in Q3FY19 though the current rate of disbursements in this segment has gradually picked up.

* **Demonstrated ability to build significant competitive positions across businesses:** While the group remains a large player in the traditional broking business, it has one of the largest wholesale lending book among non-banks; this portfolio stood at Rs 17,798 crore as on December 31, 2018 (Rs 19,525 crore as on March 31, 2018, excluding capital deployed in distressed assets credit). In the distressed assets segment, Edelweiss Asset Reconstruction Company remains the largest asset reconstruction company (ARC) in India with total securities receipts managed at around Rs 45,000 crore as on December 31, 2018 (Rs 43,598 crore as on March 31, 2018). In the commodities business, the group has exited its agricultural commodities and precious metals trading businesses and is focusing on the agricultural credit and value chain services business.

* **Established position in capital market businesses:** The earnings and accretion to capital are expected to result in a regular stream of fee-based income over the medium term, given the established market position in capital market related businesses. Profit from the fee-based capital markets and asset management businesses increased in fiscal 2018 compared with fiscal 2017, and is expected to witness healthy growth over the medium term. The group has an established franchise in institutional broking and investment banking, and an expanding presence in retail broking, wealth management, and asset management. It is also one of the largest Indian institutional brokerage houses, with over 300 foreign and domestic institutional clients. The retail broking franchise is also expanding, with more than 5.55 lakh unique clients as on December 31, 2018. The group operates across the corporate finance and advisory domains-equity markets, private equity, mergers and acquisitions, advisory structured financial syndication, and debt issues. The wealth business and alternate assets business have also witnessed significant growth. Assets under advice in the global wealth management business were Rs 1,00,300 crore, and the assets under management in the asset management business were Rs 36,400 crore, as on December 31, 2018.

Weaknesses

* **Asset quality exposed to risks related to concentration in wholesale lending:** Asset quality will remain vulnerable to the concentration risks inherent in the wholesale loan book, despite the strong focus on collateral. As on December 31, 2018, wholesale lending constituted almost 50% of the total loan portfolio (excluding distressed assets credit), with the 10 largest loans constituting 17% of the wholesale portfolio. A sizeable proportion of this book is currently under moratorium with bullet or staggered repayments. On account of this, while reported non-performing assets (NPAs) in the segment are expected to remain low, the ability to refinance/exit some of these exposures will remain key a monitorable, considering the current challenging environment in certain business lines like the real estate developer segment.

Also, around 60% of the wholesale portfolio comprises real estate loans; this segment is vulnerable to cyclical downturns. Further, given the current evolving liquidity situation since September 2018 for non-banks, asset quality on the group's exposures to loans against property (LAP) and loans to micro, small and medium enterprises (24% of the loan book as on December 31, 2018, excluding capital deployed in distressed assets credit), would also be a key monitorable. This stems from sensitivity of borrowers of such loans to an environment of prolonged liquidity tightness.

Nevertheless, the group had an adequate networth to cover for asset-side risks at 32 times as on December 31, 2018; the level of gross NPAs was also comfortable, at 1.84% with net NPAs at 0.78%, as on December 31, 2018. The networth is expected to improve further considering the recent announcement of capital infusion of Rs 1,800 crore by Caisse de depot et placement du Quebec (CDPQ) in ECL Finance Ltd.

Any sharp deterioration in asset quality, specifically in the wholesale lending book, will also impact profitability and capital, and remains a key rating monitorable.

* **High gearing:** The gearing remains higher than that of peers. As on December 31, 2018, the gearing was 5.8 times, while the net gearing excluding the liquid assets of the balance sheet management unit (BMU) was 4.2 times. The group raised around Rs 1,528 crore through a qualified institutional placement issue in fiscal 2018; this led to a decline in gearing. In March 2019, CDPQ has agreed to invest around Rs 1,800 crore in the form of compulsory convertible debentures (CCD) in ECL Finance Ltd which should further reduce the leverage ratio in the near term. Gearing, thereafter, is expected to gradually increase to 5-6 times over the medium term.

* **Lower profitability than peers:** Profitability ratios are lower than those of other large financial sector groups; return on assets (annualised) was 1.6% and return on equity (annualised) 12.9% for the nine months ended fiscal 2019. While profitability has been improving over the past few fiscals, it remains lower than that of peers as a significant portion, over 25%, of the capital (equity plus borrowings) is employed in businesses or investments that are either low-yielding or loss-making at this point. The group has a large balance sheet management portfolio under its Balance Sheet Management Unit (BMU), which is used for managing liquidity. This

comprises largely of government securities, fixed deposits, liquid mutual fund units and corporate bonds, which have a low return on capital employed. Furthermore, the life and general insurance businesses continue to be loss-making. The general insurance business was started in February 2018, after requisite approvals were received from the Insurance Regulatory and Development Authority of India. This business is also expected to reduce consolidated profitability in the initial years of operations, given its long gestation period. Expected improvement in profitability of the insurance business and reduction in the share of funds allocated to BMU will benefit profitability only over the long term. In the near term, profitability could come under pressure owing to increase in borrowing costs coupled with limited ability to pass these on to borrowers and higher liquidity cushion maintained in low yielding liquid assets.

Liquidity

Liquidity is adequate. As a policy, the group maintains liquidity cushion of 9-10% of the balance sheet size. Even in the current market conditions, there was a cushion of around Rs 4,646 crore in the form of liquid investments (around Rs 2,346 crore) and unutilised bank lines (around Rs 2,300 crore) as on April 12, 2019. This excludes an amount of Rs.500 crore temporarily deployed in an episodic opportunity. Apart from this, the group has a treasury book, which can be dipped into if needed. As of April 12, 2019, the overall liquidity was adequate to meet debt repayment of around Rs 3,500 crore due over the three months ending June 30, 2019. Further, assets and liabilities continue to be well-matched as can be seen from the trend in cumulative mismatches in three-month and one-year buckets.

Outlook: Stable

CRISIL believes the Edelweiss group will continue to benefit over the medium term from the diversified business and earnings profiles, the ability to build a significant market presence in chosen lines of business, and an established position in capital-market-related businesses. The outlook might be revised to 'Positive' in case of improvement in the capital position, along with significant reduction in the gearing, and continued increase in granularity of the overall credit book. The outlook may be revised to 'Negative' in case of asset quality challenges in the lending business or a more-than-expected increase in the gearing. It might also be revised to 'Negative' in case there is unrelated diversification by the group.

About the Company and Group

ECLF is a non-deposit-taking, systematically important, non-banking financial company (NBFC-ND-SI) registered with the Reserve Bank of India, and is currently a wholly owned subsidiary of Edelweiss Financial Services Ltd (EFSL; the parent and holding company for all group companies). The company is the flagship lending arm of the Edelweiss group. In March 2019, CDPQ had agreed to invest around Rs 1,800 crore in the form of CCD in ECLF which upon conversion will lead to a dilution of the stake of Edelweiss group in ECLF.

The group comprised of 57 subsidiaries and 4 associate companies as on March 31, 2018. However, as a part of reorganisation of the group structure, the number of subsidiaries was reduced to 52 as of December 31, 2018, and there are plans to further bring it down in fiscal 2020 to around 35 (subject to requisite approvals). The group had 476 offices (including 8 international offices in 6 locations) in around 200 cities as on December 31, 2018. Its main business lines are credit, franchise businesses, and insurance. These businesses entail loans to corporates and individuals, mortgage finance, including loans against property and small-ticket housing loans, SME finance, agri credit including commodity sourcing and distribution, institutional and retail equity broking, corporate finance and advisory, wealth management, third-party financial products distribution, alternative and domestic asset management, and life and general insurance. In addition, the BMU focuses on liquidity and asset-liability management.

For fiscal 2018, profit after tax (PAT) of the group was Rs 890 crore on total income of Rs 8,619 crore against PAT of Rs 609 crore on total income of Rs 6,619 crore in fiscal 2017. The net worth of the group increased to Rs 7,762 crore as on March 31, 2018 (audited), from Rs 5,288 crore as on March 31, 2017.
